TechnoRiver 
Outstanding Printing Software

What is TechnoRiverStudio?

TechnoRiverStudio is the industry-leading label design, barcode and printing software. It is feature rich and easy to use. With comprehensive database support, powerful design capabilities and extensive barcode support, it is the ideal tool for the print industry professionals.

Whether you are printing hundreds or thousands of labels per day, or having multitudes of different printer types and label designs, TechnoRiver's state-of-the-art auto identification software is field-tested to provide the robustness necessary in meeting all the demands of your business.

True WYSIWYG Label Design

TechnoRiverStudio provides you with a **high precision view** of your label and total **control** of your label's appearance, including bar codes, text, graphics, rich text and shapes. You can import pictures from your scanner or camera and place them exactly where you want them to be. You're limited only by your boundless imagination.

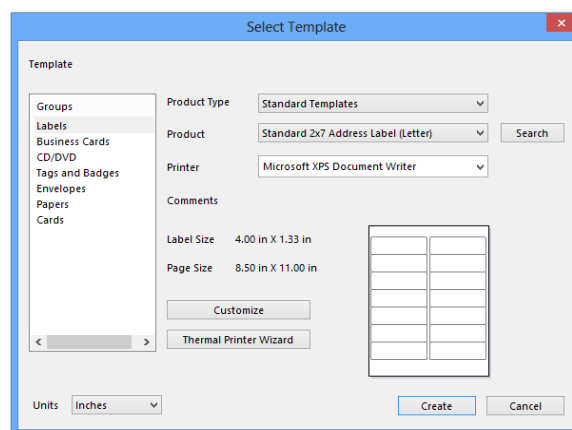

Numerous 1D and 2D Bar Codes Support

TechnoRiverStudio supports nearly all the industries widely used 1D and 2D barcodes. Accuracy and quality are the two key aspects of the bar code engine of TechnoRiverStudio that produces the most recognizable barcodes in the industry.

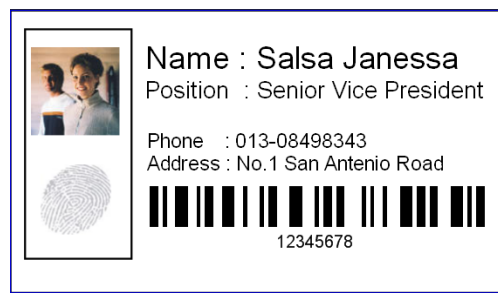

Huge Label Stock Templates Database

TechnoRiverStudio offers a huge--one of the industry largest!--and expandable Label Stock database. The Stock Database stores the dimensions of many different labels. This greatly simplifies the task of label design. It does not stop here; other products like name cards, PVC cards, letters, papers and badges are also supported as well. New label dimensions can also be easily added and managed using the Label Manager and then exported and shared with other TechnoRiverStudio users.

ID Cards Design

TechnoRiverStudio also provides advanced identity capabilities including integrated photo and graphics management module for creating identification cards. Design your company ID cards in minutes!

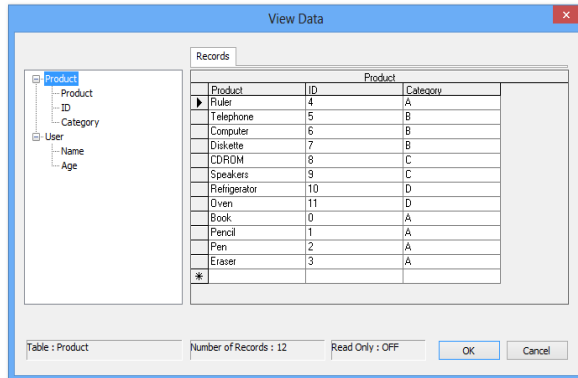

Print Time Data Entry

When creating documents, e.g. invoices, orders and shipping labels, using a pre-designed, tested template while entering portions of the data at print time is ideal. TechnoRiverStudio allows this by providing powerful combination of static templates with Print - Time data entry dialog. Both text and barcodes in the document can be configured to support print time data entry.

Database Support

TechnoRiverStudio reads from most database platforms such as Microsoft Access, Microsoft Excel, FoxPro, dBase, delimited text files, ODBC DSN, OLE DB and many more. These database records can be used to generate barcodes or text fields on the labels.

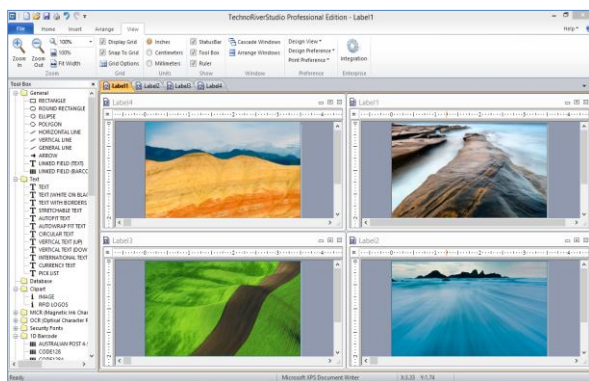

Sophisticated Record Selection and Filtering

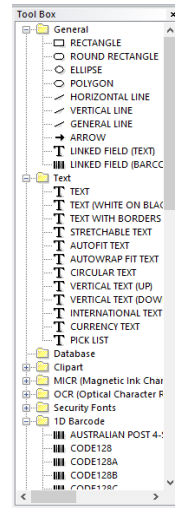

TechnoRiverStudio provides unmatched power and flexibility to assist in the selection of records for printing. This ranges from the simplest search on a file, to UI-based records selection, to the most sophisticated query statements.

Smart-Acquire Images

Insert acquired images from any TWAIN compatible device including digital cameras, scanners, and biometric devices into your design. TechnoRiverStudio also includes an integrated image-processing module to crop, flip, rotate and process acquired images. These images can be added to the document design easily.

Modern User Interfaces

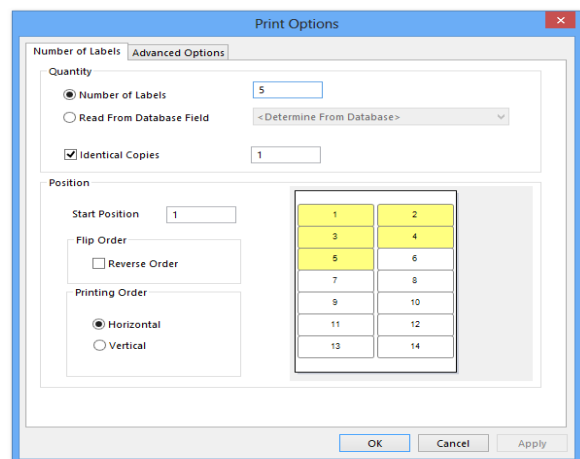

TechnoRiverStudio has one of the most **innovative and intuitive** user interfaces. You just want to print labels and you don't want to spend too much time on it. It doesn't matter if you are a professional user with complex tasks or a desktop user. With TechnoRiverStudio you will be able to solve your problems quickly and you don't need extensive training to do it.

The truly unique **"One Touch"** objects toolbox gives you instant access to an extensive set of shapes, text and bar code components. Simply drag and drop the type of objects required and then customize as desired.

Flexible Print Options

TechnoRiverStudio offers an extensive set of options for printing. From selecting the start position of a label sheet, to setting the quantity of labels to print by reading from a database field, to selecting a range of database records, to using filter and sort tools, nearly every conceivable option is configurable in TechnoRiverStudio. Automatic printer detection and configuration is provided, including paper bin detection.

Free Technical Support, Free upgrades for a year

TechnoRiver provides comprehensive support to our customers. Registered users are entitled to free email, phone and fax support. Users are also entitled to a 1 year free upgrade of the software.

Specifications

Design Features

- True WYSIWYG editor
- **"One-Touch"** drag drop User Interface
- High Precision On-Screen Display
- Full color editor
- Advanced Print Preview
- Multiple Document Interface
- Linked Fields/Barcodes
- Multiple Objects Selection
- Automatic Objects Alignment
- Objects Grouping
- Grid Options / Snap To Grid
- **Office Ribbon User Interface**
- Undo/Redo
- Concurrent Object Properties Update
- Graphics import in different formats
- Metric and US Measurement Systems
- Linked Fields Functions
- Label Password Protection

Text

- Full Text Options
- Automatic Stretchable Text
- AutoFit Text
- AutoWrap Fitting Text
- Circular Text
- Rotation
- Wrapping
- Rich Text Support
- Print-time Data Prompt
- Date/Time specification
- Paragraph Support
- Database integration
- White on Black Text
- Security Text
- OCR Text
- **MICR Text**
- **International Text**

Graphics

- Vector Graphics
- Clipart Library
- Image rotation
- Image aspect preservation
- Print-time Data Prompt
- Image Processing – Brightness, Contrast, Grayscale
- Image From Database Paths
- Acquired image editing - crop, flip, rotate
- RFID Logos

Design Objects

- Rectangle
- Round Rectangle
- Ellipse
- Line
- Arrows
- Border Specification
- Corner Roundness Specification
- Border Thickness Specification
- Transparency
- Rotation
- Gradient
- Pattern filling (Over 50 types)
- Polygons and Stars

Barcodes Supported (Linear)

- Australian Post 4-State
- CODE128 (Auto)
- CODE128 (A, B, C)
- CODE39
- CODE39 FULL ASCII
- CODE93
- EAN13 (with extension support)
- EAN8 (with extension support)
- HIBC
- GS1-128
- GS1 DataBar-14
- GS1 DataBar Limited
- GS1 DataBar Stacked
- GS1 DataBar Stacked Omnidirectional
- GS1 DataBar Truncated
- I2OF5
- Circular I2OF5
- ISBN (with extension support)
- ISBN 13 (with extension support)
- ISMN
- ISSN (with extension support)
- MSI
- POSTNET
- RATIONAL CODABAR
- RSS14
- RSS14 Limited
- RSS14 Stacked
- RSS14 Stacked Omnidirectional
- RSS14 Truncated
- S2OF5
- UCCEAN128 (Full AI Wizard support)
- UPCA (with extension support)
- UPCE (with extension support)
- UPC Extension 2
- UPC Extension 5
- USPS ONECODE

Barcode Supported (2D)

- PDF417 (Truncation, ECC Level, Data Columns)
- Micro PDF417
- Data Matrix (Square and Rectangular)
- QR
- Micro QR

Predefined Label Stock

- Huge database of industry templates
- Labels
- Paper and Cards
- Name Badges
- CD/DVD
- Envelopes
- Templates Customization
- Templates Management
- User Database
- Advanced Templates Search

Image Acquisition

- Digital camera support
- Webcam support
- Scanner support
- TWAIN compatible device
- Image file
- Cropping
- Barcodes
- Photographs
- Signatures

Image Editor

- Insert images from camera, scanner, database or disks
- Preserve Image Aspect Ratio
- Crop and rotate images
- Prompt for image path
- Horizontal and Vertical Flipping of images
- Save edited images to disk or database

Database Support

- Microsoft Access and Excel
- Microsoft SQL Server
- ASCII Text Files (.csv, .txt and .tab)
- dBase
- FoxPro
- ODBC DSN
- OLE DB
- MySql
- PostgreSQL
- Interbase
- Informix
- Sybase
- DB2
- Paradox
- Oracle
- Standalone database
- Integrated database editor
- Networking and data sharing support

• **Concurrent Multiple Database support**

- User Credentials
- Custom SQL
- Text File Schema Specification

Filter and Sort Records

- Flexible and powerful records selection
- Select multiple records for printing
- Specify range of records for printing
- Custom SQL for records selection
- Records sorting with multiple ordering
- Records filtering with multiple criteria

Barcode Support

- Industry standard adherence
- Precise bar width specification
- Stretchable Bar Width specification
- Database integration barcodes
- Advanced Serialization
- Sequentially Numbered Bar Codes
- Print-time Data Prompt
- Start/Stop character specification
- Human readable text options
- Automatic Check Digit
- Wide-to-narrow bar specification
- Fixed Data Source
- Human Readable Text Formatting
- Variable Data Source - database and counter

Counter and Serialization

- Serialized text and barcode objects
- Numeric and alpha-numeric counters
- Decimal and base number systems
- Prefix and suffix options
- Start and Step Options
- Padding options
- Minimum and Maximum specification
- Sampling illustration

Print Manager

- Integrated Print Preview
- Print document layout in one easy step
- Printing Order and Position
- Specify number of labels (including database field)
- Identical Copies options
- Select pages for print
- Destination printer, paper source selection
- **Duplex Printing**
- Start Position specification
- Specify print method
- Apply calibration
- Label crop marks
- Interrupt or cancel print job
- True Windows Drivers
- Local and Network Printer Support

RFID (Radio Frequency and Identification)

- EPCGlobal
- ISO Standards

Automation (Command Prompt)

- Issue commands to print labels or to a PRN file
- Specification of print options from the DOS Command Prompt
- Specification of SQL to select records
- Drop Files processing from command line

Integration (Automatic Scanning)

- Template/Data file separation
- Directory/Email Scanning

Printer Support

- Autronics • Argox • Avery Dennison • Blazeprint • Brady • Cab • Canon • C. Itoh • Century • Citizen • Cognitive • Compuprint • Comtec • Datamax • Datasouth • EdiGuard • Eltron • EPC • Epson • Etimark • ETISYS • Facit • Fargo • Genicom • Godex • Hewlett-Packard • IBM • Intermec • Itabora • Lapis • Lexmark • Magicard • Markem • Markpoint • Meto • Monarch • MPH • Novexx • Okabe • Okidata • Panasonic • Paxar • Persona • Pitney Bowes • Pressiza • Printronix • Quick Label • SATO • System Wave • Datasouth • TEC • Tektronix • Texas Instruments • Tharo • UBI • Ultra • Unimark • VIPColor • Xerox • Zebra
